DELHI TRAFFIC POLICE

PRESS RELEASE

Delhi Traffic Police identifies 1,421 vehicles with 100 or more challans each, Flags with the Transport Commissioner

Delhi Traffic Police, Zone-I, has identified 1,421 vehicles against which 100 or more traffic challans have been issued per vehicle. The identified vehicles comprise 723 commercial vehicles, 600 private cars, 85 two-wheelers and 13 vehicles of other categories. The matter has been taken up with the Commissioner, Transport Department, Government of NCT of Delhi, with a request to examine for appropriate actions under the Motor Vehicles Act and the applicable rules.

The concern extends beyond the number of challans. Each challan records an individual violation, while the enforcement history of a vehicle shows how often violations have recurred. In the cases referred to the Transport Commissioner, the frequency of violations warrants closer examination, particularly in view of the risk that repeated disregard of traffic rules poses to pedestrians, cyclists and fellow motorists.

Delhi Traffic Police has requested the Transport Department to consider the violation history of each vehicle for appropriate action against its registered owner and the Transport Department has started issuing notices to the registered owners. The objective is to prevent further violations by ensuring that cases of persistent non-compliance receive follow-up from both the traffic enforcement and transport authorities.

Delhi Traffic Police appeals to registered owners to review the challan history of their vehicles. Where a vehicle is used by several drivers, owners are urged to bring recurring violations to the attention of those driving it and take steps to prevent their recurrence. The cooperation of vehicle owners and drivers is essential to making Delhi's roads safer for all.

(VIJAYANTA GOYAL ARYA) IPS
Addl. Commissioner of Police,
Traffic (Zone-I), Delhi.
