ORDER

1. Kite flying has been a passionate sport in Delhi and for kites flying thread made out of plastic, nylon or similar such synthetic material including popularly known “Chinese Thread/Manjha” or any other thread coated with glass/metallic components are being used which cause a lot of injuries to the people as well as to the birds.
2. Whereas of late, a new type of “Manjha” with metallic powder coating is available in the market. This type of “Manjha” is not only very strong but also a good conductor of electricity. 3. And whereas, during kite flying several kites get cut in the sky as a consequence of kite competition or otherwise. All these cut threads along with the kites remain on the land and because of the very long life of the plastic materials and being non-biodegradable in nature; these threads become a cause of concern from environment point of view and adverse effect on human being, cattle population, birds, soil and ecology.
