Sub:- Sting Operation reg. breach of Security at Jawaharlal Nehru Stadium

This Sting operation is totally bogus & incorrect. The reporter is trying to create false impression of security breach by walking from barricades placed on the main road only to divert vehicles. That place is far off from the main entry gate of Jawaharlal Nehru Stadium from where the actual manual checking of pedestrians is done at this stage and the reporter had not reached upto the checking point. There is no locked down in Jawaharlal Nehru Stadium security. Thereafter security checks commenced at the perimeter where the "reporter" was detected. Security will be bolster up with additional deployment after the complete locked down and substantially more during Games time. Such a sting operation seems to be motivated and deliberately planted in which reporter does not even know that Ammonium Nitrate is a fertilizer and a non-prohibhited item for sale in India.
